WORK EXPERIENCE

Scranton-Gillette Communications

Oct. 2022 – Present

Web Developer

Palatine, IL

- Demonstrated strong problem-solving skills by independently troubleshooting and resolving diverse software issues amid fluctuating expectations and priorities
- More than doubled ad impressions through custom PHP module
- Automated article data collection and streamlined transfer to Google Analytics via JavaScript solutions, enhancing data tracking efficiency
- Refactored website with Bootstrap
- Created 16 responsive email templates that display across devices, clients & dark mode
- Coded pixel-perfect web pages with CSS and Twig according to Adobe XD wireframes
- Ensured full website accessibility compliance with WCAG 2.1 guidelines
- Contributed to collaborative code repositories and MySQL databases across git, GitHub, and Pantheon, completing an average of 7-9 client-facing tickets per week
- Independently troubleshooted 1-3 backend bugs per week, eliminating threats to revenue, security, and user experience
- Earned acclaim from peers and management for clear communication through Jira, Trello, Bugherd, and video meetings with stakeholders
- Configured and debugged environment tools, such as Laravel Valet, Homebrew, and Composer.
- Optimized website functionality through Google Tag Manager, Solr search engines, sitemaps, and metatags

ELECTIVE DEVELOPMENT

- Independently developed 12 websites and web apps to gain experience in JavaScript & React.
- Honed proficiency in developer tools by utilizing modules through Webpack and npm, implementing ES6 best practices for maintainability, integrating JSON and APIs to achieve advanced functionality, and ensured mobile responsiveness to cater to diverse user experiences.
